

Politics

Overview

This document contains my personal, practical understanding of gun related politics.

I like to think of myself as being logical and measured - but this entire document could be 100% out of touch with reality.

If politics disturbs you - or you are left leaning I would recommend not reading this document as it may ruin the project for you.

Why build guns?

1. Because it's fun
2. Because it's practical
3. Because you will learn something

But guns are dangerous

Yes guns are dangerous, but so are a lot of things.

By removing guns you do not remove danger you simply shift the nature, duration and result of the danger.

Guns can not be uninvented, and by removing guns from the majority of the population you create a larger long term danger that only presents itself when it is too late to change.

The nature of this danger is the "government". Legitimate or not government poses the highest danger to man kind.

All major government lead genocides were preceded by of period of mass gun control.

By removing guns from the hand of all citizens you change the risk of being murder by a private citizen to the risk of being genocided by a government official.

Guns are best unfired

Guns are a deterrent - similar to nuclear weapons. If every citizen had a weapon and was well-trained on how to use it the government would be deterred from even attempting to enact tyranny.

Gun control reduces violent crimes

Yes it does. But the murder rate of a government far out does the murder rate of private citizens.

“Public Health” is a term governments have been using to enact tyranny will disguise it as safety.

Violent crime is due to economic circumstances, illicit drug trading and territorial conflict.

The best way to reduce violence is to tackle the causes of violence not the tools that are used in them.

Also governments are destined to corruption. Any infringement of gun rights will continue to worsen until it is impossible to determine what is legal or illegal. The requirements will increase to the point where it is **TECHNICALLY** possible to buy or own a weapon but **PRACTICALLY** impossible due to stringent requirements, excessive fees or long wait times.

Only special people should own guns

Police, military, security guards are not a **BETTER** or more **MORALE** type of individual. There is no evidence that people are safer with only certain people armed. However, there is plenty of evidence that the opposite is true.

A police or military that rules over an unarmed population will receive no resistance to corruption. The unarmed population is destined to slavery or worse.

My proposition

I believe in 2A worldwide. But with a difference.

I believe in **ENFORCED ARMAMENT**.

My proposal is as follows:

1. All houses required to have the same long and short arm as the police and military
2. All houses required to stored said arms in a safe with access only to adults
3. All adults trained yearly in a minimum 3-day course of gun safety
4. All weapons to be inspected by an official 6 monthly to ensure they are present and in good condition
5. No restrictions or infringement on long or short arms
6. No special permits or licenses required to manufacture or modify arms for **PRIVATE** use
7. Upkeep of **PRIVATE** arms to be tax-deductible
